

CODE OF ETHICS FOR FACULTY OF ELECTRICAL ENGINEERING UNIVERSITY OF LJUBLJANA GRADUATES

Graduates of the Faculty of Electrical Engineering at the University of Ljubljana are, as engineers, aware of the importance of technical knowledge received during the course of our studies, and the impact of technical knowledge on the quality of life in a modern society, so we take personal responsibility for our profession and the well-being of the community and we oblige ourselves in accordance with ethical and professional principles to:

1. responsibly make professional decisions for the benefit of security, health and the well-being of the population and refuse all decisions that may harm or endanger people or the environment;
2. be honest and realistic in citing professional claims or estimates, based on all available data;
3. fulfil technical knowledge, its understanding, use and potential effects of its use;
4. perform technological tasks only if we have sufficient knowledge and experience;
5. accept and/or express constructive criticism of technical work, admit and correct errors and cite other people's contributions in a suitable manner;
6. help colleagues and co-workers with their professional growth and encourage them to follow this code of ethics.
